WORK EXPERIENCE

Hack Reactor

Software Engineering Immersive Resident

04/2020 – Present

Software Engineering Immersive

Achievements

- Built an end-to-end attendance feature for an internal student dashboard to migrate data and functionality from the program's G Suite over to the internal platform
- Conducted 30+ technical interviews for current and prospective students, assessing their technical capabilities and delivering comprehensive feedback
- Mentored 40+ students through whiteboarding sessions, technical support, and office hours to solidify their understanding of JavaScript full stack development concepts

American International Group

Senior Business Analyst

08/2018 – 12/2019

Technology, Risk and Controls

Achievements

- Revamped the team's Access database by generating and designing automated reports with SQL tables and queries that efficiently and accurately informed IT leadership on audit vulnerabilities and management action plans on a biweekly basis
- Designed management action plans for AIG's IT compliance to CCPA, RCSCA, SOX, and Internal Audit regulations, safeguarding the IT organization from risk

American International Group

Technology Analyst

07/2016 – 08/2016

Technology Analyst Program

Achievements

- Delivered infrastructure needs for the Data Science team in their computer vision projects. Additionally, collaborated with the Audit team on a pilot with Microsoft in automating their ticket reporting system through text analytics
- Generated a multi-faceted view of financials for Business Intelligence Operations to save on spending for pricing server costs by mapping servers to applications

EDUCATION

Information Systems, Specialization in Technological Systems Management, B.S.

Stony Brook University, College of Engineering and Applied Sciences

08/2012 – 05/2016

Software Engineering Immersive

Hack Reactor

02/2020

TECHNICAL SKILLS

JavaScript

React

ES6

Node.js

HTML5

CSS

SQL

MongoDB

MySQL

Cassandra

Express

Redux

Mocha

Chai

AWS (EC2, S3, Route53, IAM)

Kubernetes

Docker

SOFTWARE PROJECTS

Zion | React · Redux · React-Bootstrap · HTML · CSS

- Maintained a controlled distribution of data flow for product information with Redux/React Router and persisted the user's favorite product choices in local storage
- Implemented a dynamic carousel with React, HTML, and CSS that allowed users to scroll through the related products of an e-commerce website's product page
- Containerized the application with Docker and deployed to an AWS EC2 instance

List.en | React · ChartJS · Spotify Web API · HTML · CSS

- Generated data visualizations for user's Spotify playlists, creating a radar chart for the playlist's valence, energy, danceability, and other audio features based on data from the Spotify Web API
- Incorporated a search feature that allowed users to look up the audio features of any track, including the BPM, key, and other track details
- Deployed application on AWS with an OAuth authentication server, giving users access to their own playlist data by logging in with their Spotify account

Pasterze API | Cassandra · Kubernetes · AWS · Node

- Extracted, cleaned, and loaded 4.7 GB of raw CSV data based on a curated schema with a query first approach. This resulted in a highly available, performant, and partition tolerant database capable of handling 1500 client requests per second with a response time of 12 ms
- Scaled the web server by configuring a Kubernetes cluster and load balancer to increase the client request capabilities to 3200 clients per second with a response time of 13 ms
- Deployed the Kubernetes cluster and database to AWS with EC2, S3, Route53, and IAM to make the API publicly accessible through an external IP address

AWARDS

Toastmasters Area 46 Speech Contest

1st Place Humorous Speech, 1st Place International Speech, 2nd Place Table Topics

Toastmasters Division D Speech Contest

3rd Place Humorous Speech, 3rd Place International Speech

ORGANIZATIONS

Apex for Youth - High School Mentor

(08/2018 - Present)

Toastmasters AIG - VP of Public Relations

(07/2018 - 12/2019)

Toastmasters AIG - Sergeant at Arms

(09/2016 - 07/2018)
